

Electric wheelchair RX7

We hereby confirm that the product listed below is a battery-powered electric wheelchair. The following technical information is provided for coordination with the respective airline for air transport.

Technical product information

Parameter	Value or note
Product name	Electric wheelchair RX7
Model	W3902
Battery type	Lithium-ion battery
Number of batteries	2 batteries
Battery removable	Yes
Nominal voltage / capacity	24 V / 10 Ah
Watt-hour rating (Wh)	240 Wh
Protection of battery contacts	The batteries are equipped with protective caps to protect the contacts. This protects the contacts against short circuits during transport.
Weight of the wheelchair	17.0 kg with battery / 15.8 kg without battery
Dimensions unfolded (L × W × H)	970 × 610 × 930 mm
Dimensions folded (L × W × H)	610 × 340 × 760 mm

Information on air transport

The batteries can be removed from the wheelchair for air transport. Removable lithium-ion batteries must be prepared for transport in accordance with the requirements of the respective airline and carried in hand luggage. The RX7 electric wheelchair is equipped with two removable lithium-ion batteries. When carrying both batteries, we recommend coordinating transport in advance directly with the respective airline.

Regulatory note

This certificate is intended to provide technical product information for coordination with the respective airline. The current requirements of the operating air carrier and the applicable IATA Dangerous Goods Regulations for battery-powered mobility aids remain authoritative. Final acceptance and carriage are subject exclusively to review and approval by the respective airline.

Kind regards,

Reizberg Mobility Tech Co. S.L.
