

An aerial photograph of a light-colored, winding path that snakes through a dense, green forest. A person is riding a golf cart on the path, moving away from the viewer. A large, stylized teal wave graphic is overlaid on the lower right portion of the image, partially obscuring the path and trees.

ZEIZBERG
Carbon made to move.

Carbon
made
to move.

Mobility as part of life.

It's a way forward.

Reizberg develops ultra-lightweight carbon mobility products for people who want to continue their way through life with lightness, confidence and independence.

***Not as something you're given.
But as something you choose.***

We see mobility as an expression of identity, movement, and participation in everyday life. Our products are engineered to support people in continuing their routines, their journeys, and their personal rhythm, with confidence and ease.

By combining advanced carbon fiber construction with refined, understated design, we create mobility solutions that feel modern, lightweight, and seamlessly integrated into daily environments. Reizberg stands for technical precision, durability, and thoughtful engineering. Every product is developed with a clear focus: to provide reliable performance while maintaining dignity, clarity, and simplicity in design.

Carbon made to move.

What makes mobility *Easier*.

Effortless handling

Less strain when lifting, folding, and moving through daily life.

Built for real life

Fits into cars, routines, travel, without friction.

Designed with intention

Clean, reduced, and made to feel like part of your identity.

Reizberg products are developed in close collaboration with an experienced and specialized manufacturing partner, combining advanced carbon production expertise with our defined quality and design standards. This integrated approach ensures consistent product quality, reliable supplystructures, and long-term technical support.

All products are manufactured in accordance with international regulatory requirements and undergo structured quality control processes.

We focus on durability, serviceability, and long-term product availability.

The Reizberg Range.

In Overview.

REIZBERG

RX1

Every day Carbon Rollator

The RX1 is built for comfortable daily mobility, easy handling and refined everyday functionality. With a full carbon frame, compact folding system & integrated seat, it is designed to support daily movement with stability, lightness and clarity.

RX3

Lightweight Carbon Power Chair

The RX3 is the lightest power chair in the Reizberg range, built in full carbon fiber for effortless handling and everyday independence. Compact, foldable and travel-friendly, designed for easy everyday mobility.

RX7

Performance Carbon Power Chair

The RX7 is built for extended range, enhanced performance and confident everyday movement. With a foldable carbon frame, integrated lighting system and dual battery concept, it is designed for longer days, greater comfort and reliable mobility in daily life.

RX1 *In Detail.*

The RX1 is built as a lightweight walking support for comfortable daily mobility, easy handling and refined everyday functionality. Its carbon construction brings stability and clarity to everyday routines. At home, outdoors and on the go.

Foldable frame. Adjustable handle height. **Integrated seat.**
Storage bag PU wheels. **Stable carbon frame.**
